MARYVILLE, MISSOURI, FRIDAY, JAN. 14, 1916.

NO. 193.

PHILIP COLBERT WON HIGH HONORS

MISS ALMA LUCAS GIVEN SECOND PLACE AMONG SENIORS.

TWO PROGRAMS GIVEN TODAY

Class Day This Afternoon and Commencement Exercises Tonight Open to Public.

High honors for the mid-year graduating class of the Maryville high school were awarded to Philip Colbert this afternoon by Principal George P. McGraw at the class day exercises. Mr. Colbert is president of the class. His percentage was 94.2 per cent.

Miss Alma Lucas won second honors with 88.9 per cent. Colbert is a son of Dean and Mrs. G. H. Colbert, and Miss Lucas is a daughter of Mr. and Mrs. George W. Lucas. The honor graduates expect to enter the State Normal school here within a few weeks.

The graduating exercises will begin at 8 o'clock in the assembly of the high school. The class address will be made by the Rev. G. S. Cox, pastor of the First M. E. church. The program which follows is open to the public only a few seats being reserved for the relatives and friends of the graduates.

Music by high school orchestra.

Class march—Miss Mary Rooker, pianist.

Invocation—William Moll Case.

"I Want to Go Down South"—Boys' octet.

Class address—Gilbert S. Cox.

"The Voice of the Western Winds"—Girls' chorus.

Presentation of diplomas—Dean Colbert of the State Normal.

Class song.

Benediction—Robert C. Holliday, Music by high school orchestra.

The orchestra is under the direction of Miss Dora Carpenter, the chorus under the direction of Miss Mary Rooker.

The class day program was held this afternoon, beginning at 2:30 o'clock, and the following program was given. The play by the seniors was especially enjoyed.

Piano solo—"Spring Song," by Mendelssohn, Miss Doris Sayler.

Quartet—"Commencement Day," by Czibulka, Misses Edith Holt and Doris Sayler and Messrs. Howard Snodgrass, and Philip Colbert.

Pianologue—Miss Edith Holt.

Class Bible—Miss Alma Lucas.

Class Play—"A Case of Suspension," Presentation of Frieze—Mr. Philip Colbert.

Acceptance of Frieze, Mr. Geo. P. McGraw.

Class Song—"Our Old High School," by Parks, members of graduating class.

The following is the cast of characters for the play which the graduates presented:

Young ladies of Seminary—Maggie Clayton, Ula Strader, Alma Lucas and Mamie Loy.

Undergraduates of a College near by—Howard Snodgrass, Charles Massie and Forrest Gilliam.

Theatre—Miss Ophelia Judkins Doris Sayler; Professor Emilus Edgerton, Philip Colbert; Kathleen, a Celtic maiden, Ethel Warren; Jonas, the Seminary "man," Rose McReynolds.

Good Thing to Catch.

A "Pay-Up-Week" will be observed at Maryville, February 21-26. There's one epidemic that should not be interfered with—Burlington Junction Post.

BIG ORCHESTRA COMING

FINAL ARRANGEMENTS FOR MINNEAPOLIS SYMPHONY MADE.

April 13 and 14 Are Dates for Three Concerts—Guarantors Will Organize.

The Minneapolis Symphony Orchestra will be in Maryville April 13-14. Final definite arrangements were completed by wire last night by Prof. P. O. Landon of the Maryville Conservatory of Music. Twenty-seven men and firms guaranteed \$500 yesterday afternoon in pledges of \$5 to \$50.

This was thought sufficient to provide for any deficit, should there be bad weather or any other causes of poor attendance at the concerts. But the list has been kept open and signers will be solicited until the total is \$1,000 so that no one would have a large sum to make up.

As soon as the list is completed a meeting of all the signers will be called to effect an organization. An executive committee will probably be elected to have complete charge of arrangements. The price for the concerts and the place of holding them will be the principal matters to be decided.

REGENERATION" TONIGHT

Gripping Human Drama of New York Life, Is Fox Feature at Empire

"The Regeneration" which will be shown at the Empire tonight is one of the strongest pictures that has ever been filmed. Under such a great director as R. A. Walsh, and with scenes and settings on which no cost was spared, with types from the Bowery that it took weeks and months to secure, and in fact with everything as nearly human as human ingenuity can make it, this picture is predicted to be an epoch in the film world.

There are scenes of New York life that are too human and too perfect to describe by words. The part of Mamie Rose is taken by Anna Nilson, who for the past four years has been considered one of the sweetest and most charming actresses of the shadowy screen.

The following is the cast of characters: Owen Conway, Rockcliffe Fellowes; Marie Deering, Anna Nilson; Skinny, the Rat, Wm. A. Sheer; Assistant District Attorney, Carl Harbaugh; Jim Conway, James Marcus; Owen and one-half to one.

With one exception our former saloonkeepers are all with us and are better than in saloon days. One should vote dry for the benefit of the saloonkeepers. As to empty houses in California, men have gone to other towns because they could not get houses in California to live in. The city treasury was \$1,000 better off the year after the saloons were voted out and the second year showed up even better."

TWO MAYORS TALK

MARSHALL AND CALIFORNIA, MO. MEN TELL OF CHANGE.

BOTH WET IN ELECTIONS

BUT FINANCIAL STABILITY OF THEIR CITIES SINCE HAS CONVINCED THEM—TAXES NOT RAISED.

In the recent campaign in Booneville some men representing various dry towns in that section of the state were asked to come to Booneville and tell of their experience with local option.

Mayor Mitchell of Marshall was the first speaker. He was a confirmed wet when the issue was up for settlement in Marshall seven years ago. He said:

The revenue was the strong argument with me as with many business men. We know now from experience that any town can get along on the general revenue allowed by law. Marshall has done it now for seven years.

We live within our income and no town has it on Marshall. We have no debt but water bonds and are paying them off rapidly. Of course, no town ever has enough money for all the improvements it wants, but in the past three years we have paved and curbed three miles of streets and put in four miles of water mains and have twenty-five new fire plugs and one hundred and twenty-five more water consumers than a year ago. There is now no truth in non-enforcement. Any law can be enforced if it has public sentiment behind it. Strict enforcement has rid our town of most of the bums. We don't average one "drunk" a month. Our people are satisfied with it and Marshall is doing as much public work as any town of its size in the state.

Business men can easily overestimate the influence of the saloon. Two wet farmers of considerable prominence near Marshall vowed they would never come to the town again if it went dry unless they had to. The town went dry and in a few years they sold out and moved to Marshall to live.

Former Mayor Joseph W. Hunter of California said:

I can't understand why I was ever wet. I took that position back in the '80s, when the issue first came up in our town, and kept it up until the issue came up again in 1907, when I realized that I was a Rip Van Winkle. Times had gone ahead of me. We voted the saloons out in 1913. For the next two years we had short crops and the next year the war upset things. But from the day we voted the saloons out the city has gone forward. Six months after they went we voted \$35,000 in bonds for a new high school. People said it would never carry without the saloon licenses. But it did—thirteen and one-half to one.

With one exception our former saloonkeepers are all with us and are better than in saloon days. One should vote dry for the benefit of the saloonkeepers. As to empty houses in California, men have gone to other towns because they could not get houses in California to live in. The city treasury was \$1,000 better off the year after the saloons were voted out and the second year showed up even better."

HOLLIDAY HOLDS REVIVAL

Buchanan Street Pastor is Assisting Rev. G. T. Ralston at Pleasant Grove.

The Rev. R. C. Holliday, pastor of the Buchanan Street Methodist church, is assisting the pastor of the Barnard circuit, the Rev. G. T. Ralston, in a revival meeting at the Pleasant Grove church, which began last Sunday.

No conversions have been reported yet and most of the work has been with the members of the church so far. The weather has kept the crowds small. Mr. Holliday will not make the hard trip back to Maryville next Sunday, and his pulpit will be supplied by men to be announced tomorrow.

Births Exceed Deaths in Nodaway.

The population of Nodaway township made an increase of twenty-eight during the year of 1915, according to figures prepared Monday by Dr. C. E. Cossins, local registrar for the state department of vital statistics. The births during the year were 50 and the deaths were 22.

William Golding and sons, Harold and Myron, returned this morning from Bedford, Ia., where Mrs. Golding was buried yesterday. Short funeral services were held at that place, conducted by Rev. John A. Currie of that city.

POLK'S ASSESSMENT

\$3,838,890 IS THE TOTAL VALUATION BY ASSESSOR.

MARYVILLE IS \$1,851,806

While the Country Assessment is \$1,987,084—Jefferson and Nodaway Township Assessments.

The assessed valuation of Polk township is \$3,838,890, according to figures just completed by E. E. Tilton township assessor. Of this amount the country assessment is \$1,987,084, and the city is \$1,851,806. The county assessment is divided: Real estate \$1,670,470, and personal \$316,614. The city is divided in: Real estate, \$1,180,590, and personal, \$671,216.

The county personal is as follows:

Number Value

Horses 2,306 \$92,585

Mules 16 1,500

Cattle 434 19,955

Sheep 5,990 83,755

Hogs 504 522

Money, notes and bonds 6,323 20,084

All other personal property 51,210

Live Stock Number Value

Horses 236 \$9,660

Mules 41 1,850

Cattle 548 3,705

Hogs 146 670

Money, notes and bonds 552,259

All other personal property 103,072

The city personal is as follows:

Manual Training in Palouse, Wash. High School Growing, But Basket Ball Team is His Hobby.

A. S. Robey received a letter yesterday from his son, Donald S. Robey, who is teaching in Palouse, Wash.

which will be of interest to all of his friends here. "Don" is an alumnus of Maryville high school and the State Normal school.

He is teaching manual training and coaching athletics in the Palouse high school. After telling that his department has grown from 40 to 115, and that he was about to start a night school, Mr. Robey gives the rest of his time to telling of his basket ball team.

One neighboring team was defeated 96 to 6. "Ask Mr. Hanson what he thinks of that score," writes "Don."

But the victory which pleased him most was that of a rival which had defeated them in the first game of the season. In the last half of the game after leading Robey's team for the first part by two points, the Palouse H. S. five came back and made 27 points while their opponents were able to make only a free throw.

Mr. Robey taught there a part of last year, after taking work in Stout university. He also took work in Corvallis, Wash., during last summer.

"TURKS TO CONQUER EGYPT"

Turkish Writer in Berlin Says Drive Across Suez Canal is Not Idle Dream.

Special to The Democrat-Forum.

Berlin, Jan. 14.—All Ferid Bey, one of the best known Turkish writers, has been in Berlin for several weeks to study the economic conditions of Germany. In an interview with a representative of the "Herliner Tageblatt," he enthusiastically predicted that Turkey will not only reconquer Egypt, but also Tripolitania and Tunis before the end of the war.

The drive across the Suez canal is no idle bluff, as the English and their Allies' claim," the Turk said. "I have been in Syria for seven months and know what is going on there. The campaign against Egypt has been prepared with wonderful thoroughness; the world will be astonished when it begins. We expect strong resistance along the canal, but there is absolutely no doubt that we will reach Cairo, as we can throw one million men into the fight on this front."

We have hundreds of thousands of men who are trained and fit but could not be used so far, as we did not have arms and ammunition enough for them. Since the road to Serbia has been opened these troops have been quickly armed and they will be ready for action in a few weeks, at the latest about the middle of February. Hundreds of German field and heavy guns have already arrived in Syria."

EYES FREQUENTLY ABUSED

Poor Light, Tobacco, Alcohol, Quack nostrums and Other Evils Cause Blindness.

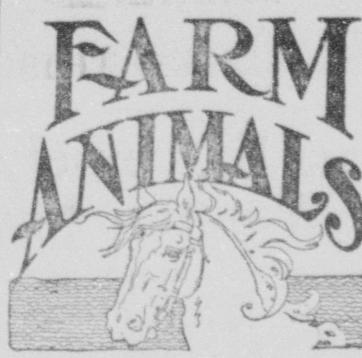

Sight being quite as valuable as life itself the admonition would seem to be unnecessary that the eyes should be scrupulously cared for. Yet, as a matter of fact, the waiting rooms of city and country oculists alike, are crowded day after day and week after week, by people who have been criminally negligent of their vision. Reading too fine print, unlead and often on glossy paper, is responsible for much of the mischief.

Poor illumination is another destructive agency. Over-indulgence in tobacco or alcohol and reading too soon after recovery from an acute illness, play also a part in the throwing away of sight. One of the least excusable of agencies is the use of proprietary nostrums, both made and sold by men who know little or nothing about the eye, and in addition, have never examined the eyes of the individual patient.

These nostrums are generally advertised as "great discoveries," but consist of substances well known to educated oculists, and which are useful or harmful according to whether the person who employs them does or does not understand the diseases of the eye and the effects of medicines thereon in all their varying stages. Spectacles, too, are bought by many people who should know better, of quacks whose only education consists of a six weeks' correspondence course under the ignorant auspices of a diploma mill. The deplorable results are seen by educated oculists daily.

The eye is, in fact, so valuable an organ, and is so frequently diseased in its deeper parts, while, externally, it seems to be absolutely sound, and furthermore, is so frequently affected by the diseases of various other portions of the body, that no one should be entrusted with its treatment or with its fitting by means of lenses, save those who are properly graduated from a first class medical college and, afterwards, have made a long careful and scientific study of this priceless organ.—Journal of American Medical Association.

TO ERADICATE CATTLE TICKS

Department of Agriculture Will Co-Operate With State or County Authorities in Battle.

Ticks take as much as 200 pounds of blood a year from a 1,000-pound steer; cut the milk production of cows nearly 50 per cent; reduce the home price of meat animals from one half to one cent a pound; prevent bankers from lending money to promote the live stock industry; keep down fertility and production of farms; and make the southern farmers pay \$50,000 a year to supply the never-ceasing barbecue of blood." Thus Carl Vrooman, assistant secretary of agriculture of the United States, remarked in telling of the new tick campaign the government has started.

"Dip the tick" is the slogan which the department of agriculture has

Dipping Tick-Infested Cattle.

adopted for a special campaign against the cattle tick. Blazoned in big letters this legend will stand out in startling relief upon a two-colored poster which the department proposes to display in every post office in the tick-infested country.

"It costs less than 50 cents a head to dip the cattle of a county and free that county from quarantine," Mr. Vrooman said, "and enable its cattle to compete with free cattle at the stockyards. But before the ticks can be cleaned from a county the people in that county, by themselves or with the aid of the state, must build dipping vats which cost from \$50 to \$100 each, and must supply arsenic, which costs about five cents per head, to make the arsenical bath that kills the ticks. The people must then join in seeing that every steer or cow is dipped a sufficient number of times to kill all the ticks infesting the cattle, and prevent the seed ticks in the grass from finding a new boarding or perhaps a little grain.

Especially during the month just preceding the mating season should the ram get the best of feed and care, for experience has shown that the ram

First Prize Winner Hampshire Ram.

which is gaining in condition at the opening of the breeding season will get more and stronger lambs than the ram which is in poor flesh. Oats is one of the best grains for use at this time.

In addition to providing plenty of pasture, and a small amount of grain during the late summer, the ram should have an abundance of water. The usual practice in pasturing the ram during the summer months is to place him in a small paddock or an orchard, where there is no natural water supply. Under such conditions it is necessary to supply water by artificial means. And when the water is supplied a little salt may be given once each week.

Mrs. H. S. Bartlett and daughter Miss Pearl, who have been the guests of the former's mother, Mrs. M. Ray returned last night to their home in Arkoe.

CORRECT FEEDING OF SWINE

One Scientist Gives Voluminous Figures, While Another Says Let Porkers Suit Themselves.

A well-known scientific research professor spent years in experimentation to ascertain the correct amounts of protein, carbo-hydrates and water to feed hogs of varying ages.

He formulated voluminous feeding tables for farmers to follow that would cause the average feeder to lie awake nights to decipher.

Now comes another investigator who produces better weights and better profits with hogs by simply allowing the porkers to feed and water themselves just as their tastes dictate.

GIRLS! THICKEN AND BEAUTIFY YOUR HAIR AND STOP DANDRUFF

Try This! Your Hair Gets Wavy, Glossy and Abundant at Once.

To be possessed of a head of heavy, beautiful hair; soft, lustrous, fluffy, wavy and free from dandruff is merely a matter of using a little Danderine.

It is easy and inexpensive to have nice, soft hair and lots of it. Just get a 25-cent bottle of Knowlton's Danderine now—all drug stores recommend it—apply a little as directed and within ten minutes there will be an appearance of abundance, freshness, fluffiness and an incomparable gloss and lustre, and try as you will you cannot find a trace of dandruff or falling hair; but your real surprise will be after about two weeks' use, when you will see new hair—fine and downy at first—yes—but really new hair—sprouting all over your scalp—Danderine is, we believe, the only sure hair grower, destroyer of dandruff and cure for itchy scalp and it never fails to stop falling hair at once.

If you want to prove how pretty and soft your hair really is, moisten a cloth with a little Danderine and carefully draw it through your hair—taking one small strand at a time. Your hair will be soft, glossy and beautiful in just a few moments—a delightful surprise awaits everyone who tries this.

CARING FOR THE RAM

Head of Average Farm Flock Receives Little Attention.

Should Be Given Every Opportunity to Keep Strong and Healthy Before Breeding Season Begins—Give Abundance of Water.

Usually, the ram which heads the average farm flock receives very little care from the time he is turned out to pasture in the spring until the advent of the breeding season in the fall. Then, about the only thing which is done is to turn him in with the ewes and allow mating to occur at random. Perhaps this is the sort of care and management which results in many barren ewes and weak lambs.

The mating season is naturally one of severe strain on the ram and he should be given every possible opportunity to keep strong and healthy. This means that he ought to have the proper kind of care, even before the breeding season begins. Of course, if the pasture is plentiful, there is not any need of feeding anything else during the early part of the grazing season. However, as the hot weather comes and the grass becomes less abundant and less succulent, it may be advisable to feed other roughage or perhaps a little grain.

In spite of these difficulties Mr. Shorer reports that, taking the 60 convicts who were retained at the camp, and comparing them with 51 civilians also working at the camp, the convicts averaged better than the civil

ROAD BUILDING

CONVICTS AS ROAD BUILDERS

Need for Co-operation Between State Highway and State Prison Departments is Outlined.

"The state highway department should hire convicts from the state prison department in exactly the same way as it would hire free laborers, and at the same price per day. During the hours of work the men should not be thought of as convicts, but simply as employees of the highway department. No payment should be made for a single hour not worked and a man discharged should be removed at once and permanently, while the highway department should have no responsibility for nor authority over the convicts at any time nor in any manner except to conduct their work or to discharge them."

This need for co-operation between the state highway and state prison departments is strongly urged in a report made to the New York state highway department by David J. Shorer, who was in charge of the convict road work in Green county, New York during the summer of 1914.

Mr. Shorer's practical experience has demonstrated the importance of the recommendation for co-operation between the highway and prison departments in conducting convict road work, which the national committee on prisons and prison labor has advocated for a number of years and has been instrumental in embodying into the laws of the state of West Virginia.

The work in Green county, New York, was carried on under most difficult conditions. The men arrived at the camp before the organization and equipment were completed. They were sent there without regard to their suitability for the work and almost one-fourth were totally unfit and unable to be returned to the prison. Arrangements for feeding the men were unsatisfactory, while winter made efficient work impossible fully two weeks before they were removed from the camp.

LOSING SOME B. B. PEP

NORMAL STUDENTS WILL PARADE BEFORE GAME TONIGHT.

High School Rooters Give Team Good Send-Off to Pattonsburg This Morning.

So much fire and pep is being shown by basket ball enthusiasts today that the temperature had to rise. First the high school students, having no school

gave their team a good send off at the Wabash this morning. They play Pattonsburg tonight and New Hampton tomorrow.

The Normal students have been steaming up all day, getting ready to show the Missouri Wesleyan team

some great spirit tonight, beginning at 8:15 o'clock. It is not known on what

train Coach "Possum" Pixlee and the Cameron players will arrive.

If you want to see some fun, be down town tonight. The Normal students will meet at Perrin hall tonight and go to the gymnasium in a body by way of Main street. They mean to see

it that the opening of the conference

season here goes off in the right kind

of style and that a victory is recorded.

The line-up of the green and white

for tonight is: Homer Scott, center;

Lollis and Vandersloot, forwards;

Wells and McClintock, guards.

Mr. Shorer's practical experience has demonstrated the importance of the recommendation for co-operation between the highway and prison departments in conducting convict road work, which the national committee on prisons and prison labor has advocated for a number of years and has been instrumental in embodying into the laws of the state of West Virginia.

Mix the Breakfast Biscuits the Night Before—

Set Them Away in a Cool Place and Bake them Fresh in the Morning

If the family do not all eat breakfast together, you can bake a few at a time. If you are having hot biscuits for supper, mix and cut out enough more for breakfast. They will be much nicer freshly baked than warmed over.

Of course you can't do this very successfully with sour milk and soda or with any of the old fashioned, single acting baking powders, but this convenient way of making hot biscuits and muffins for breakfast is entirely satisfactory if you use

which is really a blend of two baking powders, one of which begins to give off leavening gas as soon as moisture is added. The other is inactive until heat is applied. The dough will remain in a partly leavened condition for hours and when put in the oven will come up just as light and fluffy as if freshly mixed.

Get a can of KC today and try this easy way of baking biscuits at once. You'll never go back to the old way. 61

DOGS HAVE SHOES IN S. C.

Believed That Canine Fad May Spread in Protecting Feet in Hunting and Hunting.

Special to The Democrat-Forum.

Savannah, Ga., Jan. 14.—South Carolina has been accused of many things, but here is a new one. The going is so hard "over home" that it has become actually necessary to have the dogs used in hunting to wear shoes. The common yellow dog may have his day some time, but just now it is the fine animal with the pedigree, which is breaking into the new fashion.

F. C. Cler, a veteran Savannah shoe maker, has been commissioned by David Woostcroft, manager of the Goodhope Camp, near Ridgeland, to make a complete set of shoes for ten dogs, and he has now completed the order. The shoes cost forty dollars. The purchaser explains that the shoes are needed for bird dogs and others used in deer and fox hunting in order to protect their feet from the misery of the cockspur or sandspur.

The soles of the dog shoes are circular and a trifle larger than a silver dollar. They are made of welt leather. The tops, which are laced around the dog's legs, are of vici kid. The foot is forced into the shoe top, which resembles in a general way the leg of a small sock, and the lacings, which are exactly the same in type as that used in human footwear, are then drawn tightly and tied. Mr. Dog may then fidget and fret, but it is a sure shot that he will have to step off in the hunt wearing his boots.

Individual Lamps in London.

Special to The Democrat-Forum.

London, Jan. 14.—On account of the darkening of London streets to avoid giving information to the Zeppelins, some travellers now attach a small electric light to their coat sleeves so that they may read their newspapers in the trains and trams.

YOU'RE BILIOUS! LET
"CASCARETS" LIVEN
LIVER AND BOWELS

Don't Stay Headachy, Constipated,
Sick, With Breath Bad and
Stomach Sour.

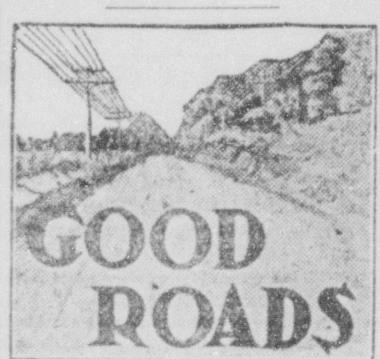

Get a 10-cent box now.

You men and women who can't get feeling right—who have headache, coated tongue, bad taste and foul breath, dizziness, can't sleep, are bilious, nervous and upset, bothered with a sick, gassy, disordered stomach, or have a bad cold.

Are you keeping your bowels clean with Cascarets, or merely forcing a passageway every few days with salts, cathartic pills or castor oil?

Cascarets work while you sleep; cleanse the stomach, remove the sour, undigested, fermenting food and foul gases; take the excess bile from the liver and carry out of the system all the constipated waste matter and poison in the bowels.

A Cascaret tonight will straighten you out by morning—a 10-cent box from any drug store will keep your stomach sweet, liver and bowels regular, and head clear for months. Don't forget the children. They love Cascarets because they taste good—never gripe or sicken.

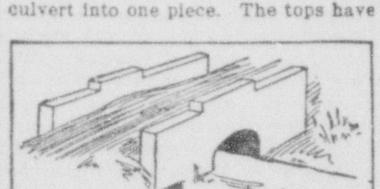

CONCRETE CULVERT IS BEST

Flat-Top Style Being Built in Kansas Is Shown in Illustration—Good Roads Save Money.

Had we begun not more than fifteen years ago to build concrete culverts and bridges in this township, and continued at the rate we have been building them the last three years, we would now have no place to put another one. Besides our expenses would not have been much more than they have been in building the wooden ones, writes J. T. King, trustee of Lincoln township, Lebo, Kan., in Farmers' Mail and Breeze. We began with the full-arch style of concrete culverts. That was before we knew the good of the flat-top kind. We now use the full arch only where there are high banks on both sides, so we can grade up to the top of the arch and make the road level. For all other places we prefer the flat top. We build them from 2 by 16 feet, to 20 by 16 feet.

All concrete work must be well reinforced with iron wire. We use any kind of bar iron in the tops, laid flat and miss lengthwise with the road. Heavy woven hog wire is laid crosswise of the top and in the wings, intermingled, so as to unite the whole culvert into one piece. The tops have

Flat-Top Style of Culvert an Approved Type.

a crowning of eight inches and are made 8 to 16 inches thick in the center, the thickness varying with the width. The forms are placed so the tops and abutments are all in one piece. The bars or rods must be shaped so as to be partly embedded in the abutment walls.

We have just finished four culverts 12 by 16 feet, made after the plan of the illustration, at a cost of \$150. This may seem to be quite a price, yet if they last as we expect them to, they will be cheap in the long run. We use a lot of iron, any length, in these tops. We get them cheap from junk dealers.

This good roads move is a money saver to the people. More has been done to improve our highways in the last five years than in any 15 years before.

TEACH GOOD ROAD BUILDING

One Sentence in Discussion of Concrete Construction Worthy of Being Printed in Big Type.

(By E. B. HOUSE, Colorado Agricultural College.)

In the engineering record of recent issue is an interesting article concerning a meeting for the purpose of instruction to road builders, by experts in that line of work.

Speaking of the meeting the Record comments as follows: "One sentence in the discussion of concrete road building would have been worth putting in black type. It is this: 'You cannot design a concrete pavement four miles long and assume that you can use the same cross-section throughout; you will have to design it the same as foundations for a building, depending on the bearing power of the soil, etc.'"

This is undoubtedly true, and yet it states a fact that is almost universally disregarded.

SOCIETY & CLUBLAND

BY MISS EMILY COATS.
Hanamo phone 42. Farmers phone 114

Announce Engagement.

Mr. and Mrs. Joe Wolfer of near Clyde announce the engagement and approaching marriage of their daughter, Miss Agatha Wolfer, to Peter Meyers, Wednesday, January 26, at their home.

Dancing Club Organized.

About ten young men of the "younger set" have formed a weekly dancing club and will give a dance each Thursday night at Ryan hall. They gave their initiative "hop" last night which was greatly enjoyed by the members and their guests. The features of these dances will be the victrola music.

Endeavor Social.

The Intermediate Endeavor of the First Christian church held their regular monthly social last night in the church parlors. The evening was pleasantly spent in playing games and in music, after which refreshments were served. There were about twenty-five members present.

Dinners for Dr. Smoot.

Mr. and Mrs. Martin Borrusch were the hosts at dinner Wednesday, when they had as their guests the Rev. and Mrs. Lewis, M. Hale and daughter, Hazel Marie, and Dr. H. A. Smoot.

Mr. and Mrs. G. B. Holmes entertained at dinner yesterday at their home, when plates were laid for the Rev. Lewis M. Hale, Mrs. Hale and daughter, Hazel Marie, Dr. H. A. Smoot and Mrs. George Herbold and daughter Mildred.

Installation at Pickering.

The Rebekah lodge of Pickering installed the following officers at their meeting Saturday: Mrs. C. J. McMillen, noble grand; Mrs. Charles Alexander vice grand; Mrs. George Wray, secretary; Mrs. Abe Lutz, treasurer; Mrs. A. L. Morford, right supporter to noble grand; Mrs. Frank Shreve, left supporter; Mrs. John Harrington, right supporter to noble grand; Mrs. Jane Leach, left supporter; Mrs. N. T. Hornbuckle, chaplain; Mrs. Harve Sadler warden; Miss Nellie Morford, conductor; Mrs. Eugenia Hull, pianist.

Ladies' Aid Met.

Officers Elected Yesterday.

The Ladies' Aid of the First Methodist church met yesterday afternoon in the parlors of the church. The election of officers for the ensuing year was held and plans for work during the year were discussed. It was decided to have the annual bazaar again next fall, and also an active workers' campaign, the plans for which have not yet been fully developed.

The officers elected were: Mrs. H. E. Wright, who was re-elected president; Mrs. R. S. Brangler, vice president; Mrs. Charles McNeal, secretary, and Mrs. J. T. Linville, treasurer.

Surprise Party

Flores Home Wednesday Night.

Mr. Orlo Bond was given a pleasant surprise by his friends at the home of Mr. and Mrs. Bert Flores Wednesday evening. Games and music were the diversions of the evening. Refreshments were served.

The guests were: Misses Eva Foster of Chillicothe, Mo., Cleo Belle Flores, Lucile Husbands, Lela Prather, Sarah Wray, Nelle Curry, Zedia Wray, Kate Curry, Mary Leech, Hazella Flores, Lela Caudle of Darlington, Mo., and Misses Lee Barton, Harley Nigh, Orlo W. Bond, Byron Wray, Carl Prather, George Barton, Roy Curry, Ernest Nigh, Albert Wray, Lloyd Killion, Elmer Montgomery of Columbia, Mo., Dale Wiley, Arthur Wray, Carl Killion, LeRoy W. Flores, Frank Andrews, Blane Archer of Maryville and John Sutliff.

This good roads move is a money saver to the people. More has been done to improve our highways in the last five years than in any 15 years before.

Birthday Party

At Conception Sunday Evening.

Mrs. George Gross entertained Sunday evening in honor of her daughter Margaret's 12th birthday. The color scheme was pink and white, while the tables were beautifully decorated with carnations and ferns. The evening was spent with games and music and dainty refreshments, consisting of ice cream and cake, candy and nuts, were served, the hostess being assisted by her sister, Mrs. P. R. Growney, and Misses Georgia Gross and Franklin Morrissey. Those present were Misses Thelma, Velma and Marguerite Proctor, Eulalia Corcoran, Fannie Pfeifer, Bernice Koppen, Mary Larson, Isabel Bickett, Helen Bickett, Loretta Bainter and Corinne Coffman, and Masters O. R. Proctor, Edward Corcoran, George Pfeifer, Rowland Merrigan, Leo Bainter, Leonard, Delbert and Robert Morrissey.—Conception Courier.

Speaking of the meeting the Record comments as follows: "One sentence in the discussion of concrete road building would have been worth putting in black type. It is this: 'You cannot design a concrete pavement four miles long and assume that you can use the same cross-section throughout; you will have to design it the same as foundations for a building, depending on the bearing power of the soil, etc.'"

This is undoubtedly true, and yet it states a fact that is almost universally disregarded.

FIRE A PERSONAL THING

INDIVIDUAL CARE WOULD REDUCE DAMAGE.

Most Home Blazes Start in Kitchen From Carelessness—Good Precautions.

A greater sense of individual responsibility for the fire waste will do much to reduce it. Men are too apt to depend upon the fire department to put out any blaze that may start and fail to provide water, buckets, ladders and hand extinguishers, which would take care of most fires before they attain dangerous proportions, and long before the firemen could come. This sense of personal responsibility would also reduce the carelessness which is to blame for the starting of the majority of the fires. On the subject of home blazes Fire Alarm says:

At every farm house and detached city dwelling there should be a ladder, such a one as can be made in a day or bought ready made for three dollars. Many fires are started in shingle roofs and in attics by sparks from chimneys, so that it is desirable, indeed, to have ready a means of access & Co. and J. B. Nunnelley, Maryville; from this, a ladder may be needed for Son and S. H. Medsker & Son, Barreson use when fire starts in a lower

fuls of water and have a diameter one-third their height. At the top of the tank is a piece of hose a yard long. When the tank is inverted, ready for use, sulphuric acid is spilled, from a bottle in its top, into a cupful of baking soda. When they get together, soda water is formed, which makes a pressure that will throw the water and gas in the tank forty feet, or over a three-story house. This apparatus is very valuable for extinguishing fire in enclosed places which could not be reached with a water bucket.

The gas carried by the water helps greatly in smothering the flame. If water carrying carbonic-acid-gas is thrown on a fire between the ceiling and floor above it, the blaze is smothered at once by lack of air. This extinguisher is worth most when used from above the blaze because carbonic-acid-gas, being heavier than air, falls. Each of the three gallons of water in the can takes out with it twenty gallons of the gas.

On St. Joseph Market. Nodaway county men who shipped a one as can be made in a day or bought ready made for three dollars. Many fires are started in shingle roofs and in attics by sparks from chimneys, so that it is desirable, indeed, to have ready a means of access & Co. and J. B. Nunnelley, Maryville; from this, a ladder may be needed for Son and S. H. Medsker & Son, Barreson use when fire starts in a lower

GOOD CROWDS AGAIN

THREE RESPONDED TO MESSAGE OF DR. SMOOT.

"PREPARE TO MEET GOD"

"Who Will Experience Eternal Death and Why?" is Topic at Revival Tonight.

PUBLIC ROADS

IMPORTANCE OF ROAD REPAIR

Impression That There Are Certain Types of Highways That Are Permanent in Erroneous.

There is no phase of the road problem more important than that of maintenance. The general impression that there are certain types of roads that are permanent is erroneous. No permanent road has ever been constructed or ever will be, according to the road specialists of the United States department of agriculture. The only things about a road that may be considered permanent are the grading, culverts and bridges. Roads constructed by the most skillful highway engineers will soon be destroyed by the traffic, frost, rain and wind, unless they are properly maintained. But the life of these roads may be prolonged by systematic maintenance. A poor road will not only be improved by proper maintenance, but may become better in time than a good road without it.

The first and last commandment in earth road maintenance is to keep the surface well drained. To insure good drainage the ditches should be kept open, all obstructions removed and a smooth crown maintained. Except for very stony soil the road machine or scraper may be used very effectively for this work. The machine should be used once or twice a year and the work should be done when the soil is damp so that it will pack and bake into a hard crust. Wide and shallow side ditches should be maintained with sufficient fall and capacity to dispose of surface water. These ditches can in most places be constructed and repaired with a road machine.

All vegetable matter such as sods and weeds should be kept out of the road as they make a spongy surface which retains moisture. Clods are also objectionable for they soon turn to dust or mud and for that reason roads should never be worked when dry or hard. Boulders or loose stones are equally objectionable if a smooth surface is to be secured.

A split drag or some similar device is very useful in maintaining the surface after suitable ditches and cross sections have once been secured. This drag can also be used to advantage on a gravel road as well as on an earth road. The principle involved in dragging is that clays and most heavy soils will paddle when wet and set very hard when dry. The little attention that the earth road needs must be given promptly and at the proper time if the best results are to be obtained.

In dragging roads only a small amount of earth is moved, just enough to fill the ruts and depressions with a thin layer of plastic clay or earth which packs very hard so that the next rain instead of finding ruts, depressions and clouds in which to collect runs of leaving the surface but little affected.

The drag should be light and should be drawn over the road at an angle of about forty-five degrees. The driver should ride on the drag and should not drive faster than a walk. One round trip, each trip straddling a wheel track, is usually sufficient to fill the ruts and smooth the surface. If necessary the road should be dragged after every bad spell of weather, when the soil is in proper condition to puddle well and still not adhere to the drag. If the road is very bad it may be dragged when very wet and again when it begins to dry out. A few trips over the road will give the operator an idea as to the best time to drag. Drag at all seasons, but do not drag a dry road.

The slope or crown of an earth road should be about one inch to the foot. If the crown becomes too high it may be reduced by dragging toward the ditch instead of from it. If the drag cuts too much, shorten the hitch and change your position on the drag. If it is necessary to protect the face of the drag with a strip of iron, it should be placed flush with the edge of the drag and not projecting. A cutting edge should be avoided, as the main object in dragging is to smear the damp soil into position.

Usually Too Narrow. The average roadway is crowned too narrow. Sixteen feet, in these days of autos and auto trucks, is none too much, and where travel is heavy 20 would be better.

G. Harbison, Fisher Mercer and Pearl Hendrix of the Myrtle Tree neighborhood are transacting business here today.

ONE DOSE RELIEVES A COLD—NO QUININE

"Pape's Cold Compound" Makes You Feel Fine at Once—Don't Stay Stuffed-Up! Take It Now.

Relief comes instantly. A dose taken every two hours until three doses are taken will end grippe misery and break up a severe cold either in the head, chest, body or limbs.

It promptly opens clogged-up nostrils and air passages in the head, stops nasty discharge or nose running, relieves sick headache, dullness, weariness, sore throat, sneezing, soreness and stiffness.

Don't stay stuffed-up! Quite blowing and snuffing! Ease your throbbing head! Nothing else in the world gives such prompt relief as "Pape's Cold Compound," which costs only 25 cents at any drug store. It acts without assistance, tastes nice, causes no inconvenience. Be sure you get the genuine.

ment is going to be an equitable meeting. Many things are going to be evened up when we get to heaven. I want you to notice that it is going to be a conclusive meeting, when we meet yonder in that judgment day with God. Therefore, "Prepare to meet thy God."

SUPERVISION OF ROAD WORK

Suggestion Made by American Highway Association and National Civil Service Reform League.

A concerted movement for skilled supervision of roadwork throughout the United States has been launched by the American Highway Association and the National Civil Service Reform League. These two great organizations co-operated in the holding of a session at the recent American road congress devoted to a consideration of the merit system in road management. The United States civil service commission was represented by Chief Examiner George R. Wales, who pointed out the manifest advantages

of the old way of fitting glasses by guessing at the kind needed was often more harmful than going without them. **NO GUESS WORK NOW.**

I submit the test, the correction, and the cost to you before you are asked to pay a single cent. You take no risk nor incur any obligation by coming to me about your eyes.

H. L. Raines

HORNSTADT JUST A STEP PAST MAIN
MARYVILLE, MO.

Steam Tractor as Road Maker in India.

of competitive qualification tests as a requisite for appointment to office.

To combat the rather general impression that competitive examinations in all cases mean the answering of stereotyped technical questions, Mr. Wales said:

"For these high-grade positions where men of experience and attainments are needed an examination is given which does not require the competitor to assemble at any place or to answer technical questions. They are called upon to furnish, under oath, a detailed statement of their education and experience, including all the work they have done since graduation. They also may be asked to submit an original thesis or report on published works, and they are required to give the names of persons able and competent to testify as to their experience and personal fitness.

"Confidential inquiry is made by the commission from various sources as well as of all persons referred to by the applicant. Gratifyingly accurate and discriminating testimony is obtained by this means of confidential communication. Such testimony approximates, if not equals, the testimony adduced upon cross-examination in judicial proceedings. A demonstration of the ability of the competitive system to obtain high-class men for technical positions has been made within the past year, in connection with the employment of men to appraise the value of the property of common carriers in the United States.

"For this work the interstate commerce commission required men with qualifications ranging all the way from roadman and chairman to senior positions in civil, mechanical, structural, electrical and architectural engineering, as well as motive power men and expert accountants.

"There have been approximately 15,000 applicants for these positions, and the task of sifting the wheat from the chaff and of grading the wheat after the sifting was one of considerable magnitude; but it was done, and it was done so well that the interstate commerce commission expressed its gratification to find that it could secure a force so well equipped to perform the gigantic task of obtaining an accurate appraisal of the value of common carrier property. A system which can successfully secure a competent force of high-grade engineers for this valuation work could surely provide the proper kind of men to have charge of the construction and maintenance of public highways."

It is expected that steps will be taken to wage an active campaign in every state for the elimination of the spoils system and to substitute for it the merit system.

FARM at Public Auction

In order to settle the estate for eastern heirs, we will sell at public auction, the farm known as the Jacob King farm, 6 miles east and 2 miles north of Burlington Junction, 2 miles south and 5 miles east of Clearmont, 2 miles north and 5 miles west of Pickering Mo., on

**Friday, January 28, 1916
at 1:00 p. m.**

182 acre Farm

NW 1/4 and 30 Acres NE SW 3-65-36.

This farm is in good state of cultivation, has a good house and barn and is well fenced. This will be an absolute sale and your price will buy it, for our instructions are to sell it regardless of price. If you are looking for a bargain in a good farm don't overlook the opportunity. Possession will be given March 1st, 1916. The title is perfect and abstract and warranty deed will be furnished.

SALE TO BE HELD ON ABOVE FARM AT 1 O'CLOCK.

TERMS—CASH. However we can manage terms for buyer if desired.
